

TPWS Antenna

Manufacturing Ref. TY255

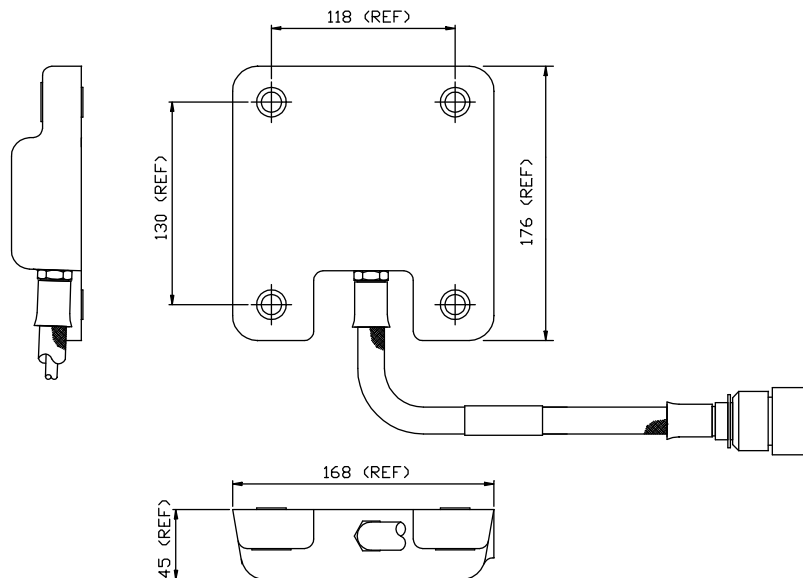

The TPWS Antenna forms part of the STS Rail Train Protection and Warning System complying with the requirements of Network Rail Group Standard GE/RT8035.

The Antenna is manufactured using a KEVLAR reinforced polymer material provides good impact resistance making the unit suitable for mounting on the bogie of high speed trains.

The unit is mounted using Four M12 fixings.

A integral stainless steel braided conduit with multipole bayonet connector enables ease of installation and good environmental protection.
